# Triple+

Triple+ is an IoT (Internet of Things) Company within the PropTech arena whose breakthrough cloud-based proprietary solutions for detecting, monitoring and preventing water leak damages and saving water is changing the way homeowners, property managers, real estate developers, high-rises, plumbers and insurance companies safeguard their properties.

Founded in 2010, the company has grown exponentially and is a major player in the global marketplace, with offices in USA, Canada, Russia, Bulgaria and Israel.

Triple+ puts you in full control of managing your property's water system. Leaks, floods, burst pipes, and water wastage are detected instantly, automatically shutting off the main water line and preventing or mitigating costly property damage, from a leaky toilet or water heater in a single family home, to elevators, machine rooms and irrigation systems in mega multi-unit or high rise properties.

The homeowner, property manager or plumber receives push alerts via their smartphone, email, and text messaging, notifying them not only about a leak or water event, but also precisely where a water problem can be found. You can manage multiple units in multiple locations, and all information is accessible on a single dashboard, whether you're on-site or away.

**Triple+ Smart Systems**

# Triple+

Our smart systems are designed to enable you to integrate with existing building management and alarm systems. You may be eligible for a discount on your home insurance premiums, since property claims due to water events are reduced or eliminated thanks to Triple+ water leak solutions.

In addition to our Flood and Flow sensors for detecting leaks, our Irrigation Controller helps you save water and factors meteorological conditions automatically for ultimate efficiency in keeping your property's landscape green.

We also offer smoke and CO detectors that alert your smartphone wherever you are.

Triple+ is proud to be certified by EPA WaterSense for promoting our water-saving devices and saving our customers between 20 - 50% water wastage.

## The Most Advanced Leak Detection and Prevention System is Suitable For:

- Apartment Buildings
- Office Buildings
- Private Homes
- Public Institutions
- Schools and Universities
- Private and Public Gardens

# About Us

**Triple+** is an innovative and leading manufacturer and marketer of products and services within the IoT (Internet of Things) arena. Triple+ offers ground-breaking solutions for water leak damage prevention in small to large-scale properties.

**OUR GOAL** To protect the property of our residential, commercial and property management customers, as well as prevent costly water leak damages, increase operational efficiency and improve personal safety.

Wear and tear, frozen pipes, overflow and careless water usage in residential and office buildings, smart irrigation and water leak prevention, are the main causes of water damage. Billions are spent annually in fixing damages caused by water leaks and the tremendous waste of water is something we can't afford to happen as droughts occur more frequently. Damp conditions also breed mold spores which are a health hazard.

**WHAT WE SOLVE**

---

## OUR MARKET-PROVEN SOLUTIONS & SERVICES

The **Triple+** line of products is based on proprietary technologies. This includes battery operated, wireless water leak sensors, repeaters, irrigation controllers, hubs and shutoff units that enable the automated control of water. The **Triple+** Central Monitoring Station is the only service of its kind in the market to protect an unlimited number of systems from a single dashboard.

---

**OUR PARTNERS** Leading insurance and property management companies, plumbing firms and HVAC contractors have already partnered with **Triple+** to reduce the number of incidents and high cost of water leak damage.

---

**Triple+ end-to-end services are available worldwide and the company holds offices in the USA, Canada, Russia and Israel.**
