OUR STORY

EZGuard development

After identifying a gap in the field of security and operations in Israel and around the world, In 2010 WIZELINK decided to develop and create the solution.

The starting point of the system was the execution and supervision of security patrols with a technological way.

Since then, the company has been working to adapt the world of security and operations to the digital revolution.

REAL TIME SECURITY AND OPERATION CONTROL

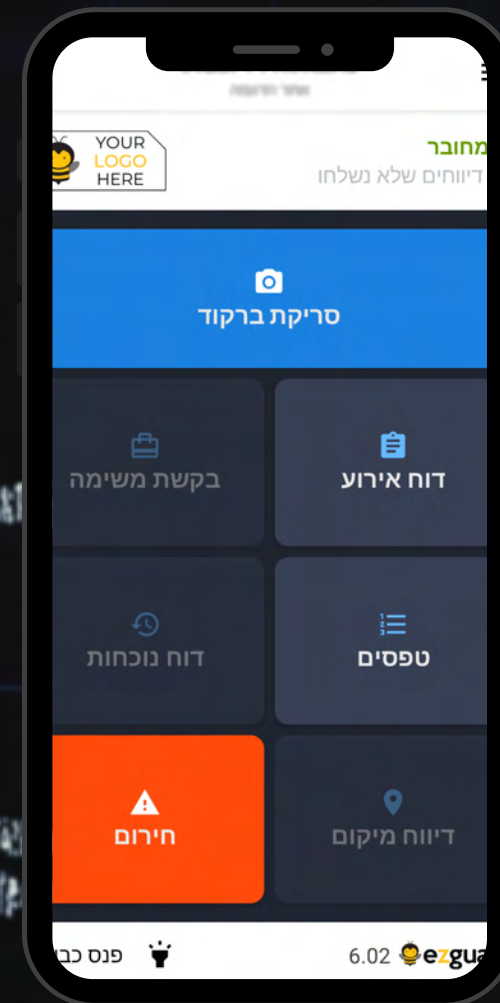

Real-time Quality Control

Be informed promptly about sites, patrols, forms, reports, tasks and emergency alerts.

Get the Best of your Patrols

Organize and schedule patrols according to your needs..
