

Are you using the IoTs in your city
to their full potential?

Thinkz ■◆■

Connecting IoTs for people

You are a smart city leader who wants to

Upgrade residents'
quality of life

Optimize the usage
of IoTs to benefit
city residents

Drive your city to
the forefront of the
smart revolution

We maximize the power of IoTs already operating
in smart cities **to create efficient usage of assets,**
resulting in a better human experience

Thinkz.

Revolutionary patent-pending technology that receives GDPR-compliant data from IoTs of all kinds, then gathers, organizes and verifies it, transforming it into responsive, comprehensive, real-time, accessible information.

After creating customized solutions for Barcelona, Tel Aviv, and Westminster, we are proud to present our **Top Three Use Cases for Efficiencies in Smart Cities**

360 MOBILITY

Live updated data of all transport is displayed on a single, easy-to-use screen, allowing integration into any desired system - enabling 360 mobility solutions

CLEAN AIR ROUTES

CO₂ sensors, parking lots and other types of transportation integrating and connected to help residents find the fastest, cleanest routes to their destination

SAFE ZONES

Ensuring safety in the city streets and public areas with the help of active IoT resources such as active city cameras, smart lighting, and free Wi-Fi zones

RESIDENTS

Streamline the everyday of urban life satisfaction, trust in the authorities, feeling of personal security, convenience and quality of life

BUSINESS OWNERS

Empower local entrepreneurs, positioning them for expansion.

VISITORS

Make travel to your smart city a seamless experience.

Partner with us to elevate quality of life in your city

Thinkz is dedicated to making smart cities more livable. We've built a global data network that eliminates barriers between IoTs and enables efficient use of a city's assets.

Data about commute times, train arrivals, and congestion is only useful if it can be organized and filtered to create actionable information.

Thinkz has created best-in-class solutions to solve the endless challenges your smart city faces.
